Accommodation Facility

20+ YEARS OF COMMERCIAL EXPERIENCE

GETC Commercial division specialises in the design, manufacture & delivery of large commercial furniture & project packages for the Hotel, Student Accommodation, Build-to-Rent, Co-living & Senior Living project sectors.

We work closely with our valued clients to provide a complete end-to-end service for all commercial project supply requirements. GETC has grown to become one of the accommodation industries most reliable and competitive suppliers of Furniture & Complete FF&E Packages.

Our dedicated in-house design, drafting, planning & logistics teams work closely with clients to deliver the most comprehensive solutions at a globally competitive price point.

Our client-focused approach, coupled with a focus on sustainability, quality assurance & specification accuracy, ensures clients receive unmatched consultation and customer service standards.

GETC is committed to providing your projects with a comprehensive solution encompassing planning, implementation, and post-completion support at the best possible price.

With over 20 years of industry leading service, we have become the market leaders in complete project supply in multiple global markets.

CERTIFICATION & SUSTAINABILITY COMMITMENTS

SUSTAINABILITY IN THE MODERN ENVIRONMENT

Sustainability impacts every facet of the communities and organisations we live and work in. As the curators of your modern workspaces, we collaborate with architects, interior designers, and builders to deliver high-performance furniture and workspace solutions.

Every aspect of the GETC business is built on sound principles of sustainability, from materials selection and manufacturing, through to our methods of distribution, installation, implementation, and recycling.

PARTNERSHIPS & COLLABORATIONS

Our product certifications adhere to global industry standards, reflecting best practices across the board. Each product or solution is meticulously crafted with environmental sustainability and the health of building occupants at the forefront.

GETC holds certifications that provide independent verification of environmental, sustainable, technical, and safety standards throughout the design, procurement, manufacturing & supply of our products.

SUSTAINABILITY AS END-TO-END COLLABORATION

Sustainability is intertwined and mutually beneficial, relying on partnerships and enduring relationships with supply chain and logistics collaborators.

Through collaborative efforts with our clients, we meticulously choose innovative, intelligent and high-performance furniture crafted with expertise and integrity from sustainable origins.

COMMITMENT TO REDUCTION

By carefully selecting materials, optimizing manufacturing and distribution processes, extending the life cycle of our products through superior design, and increasing the use of reusable and sustainable packaging, the four principles of Reduce, Reuse, Recycle, and Rethink work together to achieve a cumulative reduction in environmental impact across our entire business.

OUR INTERNATIONAL TESTING & PROJECT CERTIFICATIONS PARTNERS

Note: all items shown in the following publication may not include certification or testing data from all industry testing partners listed above

CUSTOM MANUFACTURING

Alongside our standard range of furniture items, GETC produces unique custom items, or sources a match to a particular product within our client's schedule.

We leverage our vast network to ensure there is no client design we cannot supply to specification or provide alternate options to satisfy the requirements of the project.

For custom furniture requirements, we frequently engage more than 100 associate manufacturing partners — trusted by our group for their excellence — to deliver specialist products to specific market price points.

This cooperative approach has established our ability to be exceptionally target-competitive, regardless of the client's request.

Our executive team at GETC collectively has over two centuries of experience in the manufacturing industry, ensuring our clients receive unmatched quality and project delivery benefits.

BENCHMARK SOFA LOUNGE

To complement our vast range of designer sofa lounges, GETC has developed our benchmark sofa system with the durability & flexibility commanded by the projects in which we specialise. Our experienced team of draftsmen & engineers spent countless hours meticulously developing & testing our Benchmark sofa system to ensure maximum longevity and reliability, while maintaining a modern and versatile aesthetic. The frame is constructed from solid timber and reinforced plywood, with A-grade elastic webbing & no-sag springs. Upholstered in our standard ranges of Martindale tested of commercial quality fabric, featuring reversible, separate seat cushions and premium quality high-density foam cushion inserts & internal lining.

Perfect for any office environment, we offer a completely customisable workstation & desk unit, ideal for meeting rooms, studios and shared workspaces.

Developed for high volume applications, our standard system is available in three types—regular four-leg, L-shaped & height adjustable—with conventional sizes optimised for most general applications.

We also offer total customisation of the unit dimensions and can supply the system with full power and data facilities as needed.

With the advantage of complete flexibility in material specification, we can match any requirement with our vast library of finishes & material types.

WORKSTATION ACCESSORIES

To maximise productivity, we supply a range of various high performance workstation accessories—designed specifically for integration into our systems.

From mobile pedestals and monitor arms, though to complete power and data systems, GETC can supply turn-key office solutions for any project.

SINGLE PEDESTAL GC-WS03/030

410 x 550 x 524mm

Single mobile pedestal unit with regular drawer and filing drawer with lockable function. Finished in standard range of powder coat with castors.

SINGLE PEDESTAL GC-WS03/031

410 x 550 x 524mm

Single mobile pedestal unit with regular drawer and filing drawer with lockable function. Finished in standard range of powder coat with upholstered cushion and castors.

PARTITION SCREENS GC-WS03/01

Size Varies

Detachable partition screen with powder coated aluminium mounting and acoustic pinboard insert. Select finishes available as standard.

DOUBLE PEDESTAL GC-WS03/032

1000 x 400 x 620mm

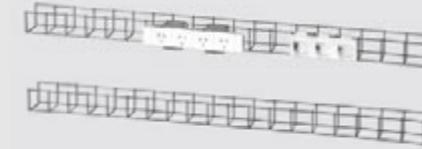

Double mobile pedestal unit with two regular drawers, one filing drawer with lockable function and shelving unit. Finished in standard range of powder coat with upholstered cushion and castors.

CABLE TRAY SYSTEMS GC-TB03/395

Size Varies

Modular cable management baskets. Australian Standard compliant. Available in select finishes.

SQ CABLE UMBILICALS GC-TB03/08A

Size Varies

Modular cable management round profile umbilical. Australian Standard compliant. Available in select finishes.

SOFT WIRING LEADS & ADAPTERS GC-TB03/275

Size Varies

All cabling & components for end-to-end connection. Australian Standard compliant.

CIRC CABLE UMBILICALS GC-TB03/08B

Size Varies

Modular cable management round profile umbilical. Australian Standard compliant. Available in select finishes.

MONITOR ARMS GC-WS03/021-22

Fully adjustable gas spring system with USB ports. Heavy duty steel construction, finished in standard range of powder coat. Available in single and twin arm varieties.

MONITOR ARMS GC-WS03/022

Fully adjustable gas spring system with USB ports. Heavy duty steel construction, finished in standard range of powder coat. Available in single and twin arm varieties.

PREMIUM CPU HOLDER GC-TB03/476

Size Varies

Vertical slide & rotate CPU holder. All steel construction finished in a standard range of durable powder coat colours.

STANDARD CPU HOLDER GC-TB03/476

Size Varies

Slide & rotate CPU holder. Steel & plastic construction finished in a standard range of durable powder coat colours.

BENCHMARK BED FRAME

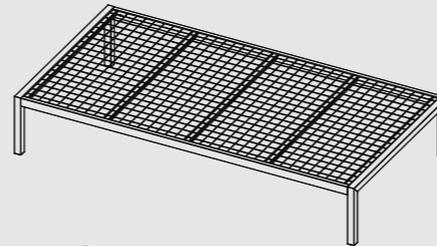

Our standard bed frame system is designed with longevity in mind. Constructed from mild steel square tubing and heavy-duty mesh, the system has an ample load capacity & is built tough to handle heavy commercial grade usage.

The system is easy to assemble, with bolt-free sleeved interlocking ends & 300mm of ground clearance for under bed storage space. The complete unit is finished in our durable powder coat and is available in a variety of colours from our standard range.
